-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 17-25 are objected to because of the following informalities:

In claim 17 line 7, the phrase "said first and second halves" lacks antecedent basis. It is apparent that "halves" should be "sections".

In claim 25 line 2, "said inner surface" lacks antecedent basis.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Corzine (US Re. 33,946).

As is clearly evident from Figure 3, Corzine discloses a method of preventing disconnection of c coupling using a device having first and second halves that are mateable to form an opening, a plurality of holes defined in said halves, the holes being aligned to receive fasteners. The flanges of the halves include the holes for receiving the fasteners. The fasteners are allen screws.

Art Unit: 3679

Claim 24 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Corzine (US Re. 33,946).

In the instance that the allen screws cannot be considered non hex-head fasteners, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a non hex-head fastener in place of the allen screws as a matter of design choice, and further in view of Applicant's statement that the threaded fastener may be any threaded fastener known and used in the art.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
